DVGW CERT GmbH
Josef-Wirmer-Straße 1-3

D-53123 Bonn
Germany

Well taken care of

A focus on customers and service is the key principle guiding our work. But this is only one of the reasons why you should opt for our services. DVGW CERT GmbH also offers its customers:

- Excellent technical expertise and detailed industry know-how
- Neutrality and independence
- International recognition through active participation in technical committees
- The advantages of cooperation with national and international partner organisations
- A focus on the market and optimum integration of all certification procedures
- Flexibility, quick turnaround and competitive fees.

Why have our customers come to rely on the industry certifier DVGW

Your benefits at a glance:

- As a service provider and partner to the energy and water sector, we ensure industry-specific integration of all certification procedures, thus creating optimum benefit for our customers and the entire sector.
- Our activities focus on quality, safety and reliability, not on the maximisation of profit.
- Anyone interested, both in Germany and abroad, may benefit from the services offered by us – regardless of membership in a federation or association.
- We guarantee the traceability of certificates at all times in order to assist our customers in need of information as well as in cases of malfunction, damage or misuse.

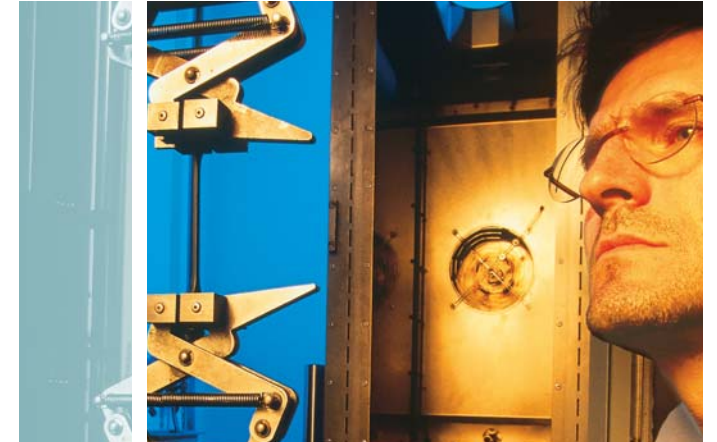

Our customers can rely on this at any time.
How about you? We would be happy to assist you.

**YOUR PARTNER
FOR EXPERTISE, QUALITY
AND SERVICE**

Partner of the industry

DVGW CERT GmbH is the independent and neutral industry certifier for the gas and water sector. As a competent service provider and partner with long-standing experience that dates back more than 50 years, we and our affiliated testing laboratories enjoy an excellent reputation both at home and abroad. The integration of the DVGW Standards and Codes of Practice guarantees sector-specific know-how, thus safeguarding the DVGW certificates' importance through-out the industry. This is a key advantage for our customers, which include product manufacturers, specialist companies, grid system operators and experts.

From the very beginning, we have contributed to the development and establishment of European standards and regulations as part of the harmonisation of the European single market. As a result, the DVGW Certification Body – the name under which DVGW CERT GmbH previously operated – achieved early accreditation and registration as a Notified Body for several EC directives. This and other accreditations recognised by legislators today enable us to offer our customers in the energy and water industry a comprehensive portfolio of services comprising European and national certification procedures. In this context, we cooperate with major domestic and international testing and certification organisations.

What do you expect from certification?

| Procedure | Manufacturers | Service providers/ Specialist tradesmen | Grid system operators | Experts |
|--|--|--|--|---|
| CE certification of products | Free movement of goods in Europe | Ensure compliance with important legal requirements | Ensure compliance with important legal requirements | Ensure compliance with important legal requirements |

Our complete package for you

Which services can we offer you?
Our range of services includes certification procedures primarily in the gas and water industry:

■ Certification of products

■ Certification of specialist companies

■ Pre-qualification of construction companies, e.g. sanitary and HVAC firms

■ Certification of management systems

■ Certification of experts.

Each procedure is based on the requirements of the DVGW Standards and Codes of Practice as well as nationally and internationally recognised directives, standards and regulations. This is why the DVGW-certified products and services of our customers are trusted and recognised throughout Europe.
